

How much will it cost?

Well the first answer is nothing to find out - our consultations are free.

The second answer is a lot less than the cost of getting it wrong.

Fixed Fee Prices It's easy to fall into the trap of hidden fees or additional costs so we want to be very clear about what we are offering and how much it costs.

Over the page, we list both the individual prices and some of the most popular package prices of services.

But, as we said in the seminar everyone, is different and if you want or need something bespoke we would quote you accordingly.

They include VAT so they are easy to understand.

Price Match We know our prices represent really good value for money but occasionally someone finds what they initially think is a cheaper offer. Not everything is as it first appears and we are happy to go through the alternative offer with you to be certain it's like for like. If we can price match it, we will.

Why don't we promise to match? Well some companies take business as a loss leader just to get a foot in the door to sell you something else or pass your details on for different products. WE DON'T, WE WON'T and we will not attempt to match a false price.

Discount or Honesty? We have worked hard to price our products fairly and honestly. We don't believe in false price lists engineered with false discounts and so please beware those who do.

Take your time You will be making some big decisions about your major assets, this takes time. Time to consider who you are dealing with. Time to consider the facts and balance them against your priorities and family needs. There are many companies out there who want you to do business with them on first meeting, they even offer discounts to do so. If you wish to you can but we are confident in ourselves, our products and our prices so we will happily leave you to consider things after our consultation no pressure whatsoever.

Of course, if you invite us back we will be delighted.

Wills All documents overseen by STEP qualified practitioners.
